Logic

New Generation Floor Recessed.
The Logic stands for a new generation of floor recessed luminaires. A complete range of **100% waterproof** (IP67) and **shock-resistant** (IK02, Max 25N/Cm²) led in-ground luminaires ensuring an intense uplight effect, thanks to the use of powerful led arrays.
The choice in installation - recessed trimless or surface mounted trim - its round or square shape and different diameters allow you to match look & feel with the design of the building.

**RANGE**

**TRIMLESS**

- **LOGIC 60 R**
  - Ø60 / 20° / FINISH ANO
- **LOGIC 60 R MOON**
  - Ø60 / FINISH ANO
- **LOGIC 60 R SP**
  - Ø60 / 6° / FINISH ANO
- **LOGIC 60 R WALLWASH / SBL**
  - Ø60 / FINISH ANO

**NEW**

**WITH TRIM**

- **LOGIC 60 R A**
  - Ø74 / 20° / FINISH ANO & B
- **LOGIC 60 R A MOON**
  - Ø74 / FINISH ANO & B
- **LOGIC 60 R A SP**
  - Ø74 / 6° / FINISH ANO & B
The uplight effect of the Logic serves to enhance the architectural character of your project and landscape. Thanks to its multiple reflector / lens options Logic can be used to accentuate trees or sculptures, but also to uplight facades or large garden features, to create a sense of depth or indicate the right direction along paths and driveways.
7,1W POWERLED 3000K*

Massive aluminum housing in anodised finish guarantees long-term durability.
Optimal cooling for extended LED lifetime due to housing in massive aluminium.

Glass is glued by robot for optimum precision.

Logic is potted with 2 component substances to make the luminaire IP67.
Installation is facilitated thanks to the incorporated **watertight power supply** with the supply cable, and the **waterproof (IP68) connector** to connect directly to the mains. As the Logic fits in Delta Light’s standard **Genie Box** you can now easily swop your Genie 90 dichroic ground spot with this new LED version.
The Wallwash versions provide an asymmetrical light distribution for a wallwashing effect, making it possible to illuminate a vertical surface (e.g. façade).
These versions are available in Alu Grey or Black Aluminium housing.
The SP version provides a very narrow and far reaching light beam (6°), ideal to accentuate heights and tall trees. When illuminating bigger trees with more foliage wider light beams are more suited.
The Moon versions were designed specifically to minimize glare and upgrade visual comfort, giving the impression of an asymmetrical light effect.
By adding tilting and rotating possibilities to the Logic family, we bring flexibility to the in-ground luminaires. In this way, precise adjustments can be made to ensure the right amount of light with the right effect on the right place.
