Tweeter

Ex-Centric Rotation System.
TWEETER introduces new levels in flexibility, both in movement as in lighting application, destined to become a longstanding classic.
With Tweeter Delta Light® introduces the **EX-CENTRIC ROTATION SYSTEM®**

The ERS is characterized by an asymmetrical hinge joint, combining extreme rotation and tilting abilities, all in one swift whirling motion.
The application of the ERS not only upgrades movement of the fixture, but more importantly also provides **ADVANCED LIGHTING ABILITIES.**
The **DOUBLE SHELL** design prevents ceiling exposure, while the flexible inner shell tailors for any lighting need.
Ultimate refinement is reached with the **OREO**: principle a subtle aureole of light circling around the central led, for improved lighting aesthetics.
EASY INSTALLATION

TWEETER TRIMLESS

TWEETER ST D

No visible wires / No visible hinge joint
TWEETER M

Originally designed to perfectly fit a QR111 lamp, its diameter was decisive for Tweeter’s dimensions. LED technology allows us to reduce size, but not reduce impact.
TWEETER M ST

Allows for an easy installation as the Small Trim covers the hole perfectly.
TWEETER TRIMLESS
TWEETER TRIMLESS 111
TWEETER ST D
Small Trim Deep
Architecture: gmp - von Gerkan, Marg and Partners Architects
Russian adaptation: JSC SPeeCH, Moscow
Interior design: MAXIM RYMAR architectural studio
features a more powerful powered led. When finished with the SBL glass you will obtain a more diffuse light effect.
TWEETER M ON 1/2
A surface mounted luminaire with 1 or 2 curious light shells.
TWEETER ON excels thanks to its ingenious design, refined to the last detail.
Available with single or double spot, Tweeter On comes with Delta Light’s unique Reo led array technology, delivering a powerful, warm light.
A PERFECT BALANCE
between lighting quality and energy efficiency, adding value to the design statement of its environment.

The shells of both the **recessed** and the **surface** mounted versions are designed to provide optimal cooling, ensuring extended lifetime of 50,000 hours for the led series.
The **Tweeter On 4** is available as ceiling surface mounted or suspended luminaire.
TWEETER ON 2
OUTDOOR

The extremely manoeuvrable Tweeter is now making its presence felt in the garden in the shape of a wall fitting and posts for directional lighting. Ideal for creating highlights out of doors. One handy feature is that the outdoor models have the same rotation versatility as the indoor models. Which means the lighting can ‘grow’ with the plants.
CTRL DELTA
WIRELESS CONTROL

An advanced lighting control solution based on the Bluetooth low energy standard. BLE is a state-of-the-art wireless technology. It is the only low power wireless technology available in all modern smartphones, tablets and smartwatches. This makes it the only mainstream powerradiotechnolog in the world. It is future proof and it is available now to control your lights.

For more information and technical info please go to www.deltalight.com/CTRLDELTA

The CTRL Delta technologie creates an easy and user friendly platform for a contemporary lighting installation.
